## 1 Up-to-date News and Information

Stay on top of all the latest news related to a particular program! Each program page offers The Latest section on the top right hand side to track the latest facts, policy changes, trainings, and other important information. In addition, a schedule of upcoming webinars on relevant topics is posted to give leaders an easy way to know what's being offered to website users.

## 2 Simple Navigation and Organization

Each program page offers an overview of the topic, key points, eligibility and availability information, and helpful resources including factsheets and policy and legislation information designed to provide leaders with a simple way to zero in on important program information in a short period of time. Along the top, leaders can always use the toolbar to find one-click access to other important parts of the site.

## 3 Additional Features

Policy and programmatic information previously available through MilitaryHOMEFRONT is now available on the leadership landing pages for each topic.

The right hand side of the page offers additional features to increase the amount of interaction users have with the page.

The Directory allows users to quickly access program-specific contact information for their installation. The contact information is pulled from the MilitaryINSTALLATIONS website and appears within the Directory on Military OneSource. In addition, users can select "advanced search" and link to the MilitaryINSTALLATIONS homepage, where they can further refine their search requirements.

Users can also subscribe to Really Simple Syndication (RSS) feeds to ensure they are alerted whenever changes are made to the program page.

A condensed list of popular web links related to the program provides an easy way to access additional information about a particular topic. In addition, there is one-click access to resources and tools designed for families or service providers.
